Hi Ambuja and Andrew,

Happy Wednesday! I hope that things are going well for you today.

I have completed the "initial readthrough" review of the formaldehyde assessment. You all have done a great job and should be proud of your work. I enjoy reading these documents because I always learn something new.

I've attached two documents. The first is my review of the document based loosely on the format I use for journal article reviews. The second document consists of the reviewed sections of the assessment, with my comments in bubbles. It was just easier to make comments on a smaller document. As always, these are simply my suggestions.

I don't have access to the L drive yet, but please feel free to put these documents in the formaldehyde folder. For the record, I did NOT look at Ambuja's paper while preparing these materials. ☺ I'll get cracking on the "response to NAS comments" review!

Let me know if you have any questions. Have a great afternoon!

John

Subject: comments on the formaldehyde neurotoxicity section

Hi all,

I completed my review of the sections that I was supposed to review. The comments are on the L drive and also attached to the email in case you cannot access the folder on the shared drive.

Thanks!

Ambuja
